

ACKNOWLEDGEMENTS

I³S Software Developers: Jergen den Hartog and Renate Reijns who have been generous in allowing free access to their software, and encouraging this project, offering help and support where needed and encouraging me in future work in this area.

Co-operating giraffe keepers and parks: My good friends at Woburn Safari Park; Lindsay Banks and Chris Smart who allowed themselves to be my guinea pig, helping me work out all the kinks in my data collection process before moving onto; ZSL London Zoo, all the giraffe keepers, John Minion, Debbie Porter and giraffe keepers Becky and Nathan at Yorkshire Wildlife Park and for coming to the rescue with eleven giraffe at the eleventh hour when another park backed out: Ross Brown and giraffe keeper Sarah at Marwell.

Dissertation Advisor: Liz Webb, who was always brutally honest and encouraging.

Statistical Advisor: Frances Hawkes

Personal Thanks: My friends Jemma Hudson, Emma Shane, Anthony Bird and Louise Murray who helped me with data collection and kept me company on long drives between wildlife parks. The most supportive and encouraging people who always understood when I couldn't come out to play when I had university deadlines to meet!

Not forgetting my mother, for constantly reminding me of the four year old me who wanted to work with wild giraffe, who has supported me through all my conservation endeavours, and for putting up with me at home far longer than could have been anticipated!
